

TOYOTA

Robust Door Solutions from Kaye Building Systems.

Kaye Building Systems commercial aluminium doors provide fabricators with flexibility in design and ease of fabrication with punch tooling available to speed up the fabrication process.

The commercial door suite is available in a range of configurations – hinged, pivot or sliding systems, which are all fully compatible with Kaye Building Systems curtain walling.

Kaye Building Systems door solutions are designed for both low traffic areas and heavy-duty use in busy public places, with maximum resistance to wear.

Kaye Building Systems commercial door system will integrate with most types of door hardware currently on the market.

NON THERMAL DOORS

Kaye building systems thermal door suite is a cost effective way to improve the thermal value of any shop front application.

The ease of fabrication of the thermal door suite (using the K corner concept) and the incorporation of standard hardware makes the thermal suite a real alternative to non thermal doors. Available in:

- **Single/Double Action Pivot Doors.**
- **Anti-Finger Trap Doors.**
- **Automatic Sliding and Swing Doors.**
- **Rebated Doors.**
- **Butt Hinged Doors.**
