# Welcome to the Window Outlet

## A fresh approach to aluminium

When we started the Window Outlet in 2014, we had a crystal-clear vision of what we wanted to achieve: the biggest and best aluminium fabricator in the business, dedicated to exceptional customer service, and delivering the sort of lead times and quote turnarounds usually only associated with uPVC.

For a start-up, those were ambitious aims. There were some who doubted we could do it. But now, just two years on, we've grown to become one of the region's busiest and most respected fabricators.

Helmed by industry veterans Ben Warren and Clive Uppington, we supply Reynaers, AluK, Exlabesa and Schueco aluminium to a spreading clientele across the south of England, and win new business by the week off the back of our reputation for passionate, dedicated customer service, and our signature commitment to 24-hour quote times and some of the speediest lead times in the industry.

We hope you find this brochure a helpful tool to help you learn more about The Window Outlet, and what products and services we provide. If you've got any questions, please don't hesitate to get in touch.

Best wishes

The Window Outlet team

## Your Showroom

You'll find this brochure packed with stunning high-quality photography of a huge selection of the doors and windows that make up our extensive range – but images are never quite the same as seeing something in person. That's why we've opened our fantastic new showroom – to let our valued customers get up close and personal with some of the products we provide, so they can see the quality for themselves. To book an appointment, call us today!

## ➤ Reynaers CP130LS

Offering strength, stability, and exceptional thermal efficiency, the Reynaers CP130LS patio door is among the most stylish and best performing currently on the market. It's a hugely versatile product, available in two configurations – duo rail and 3 rail – and can be effortlessly operated thanks to its easy lift and slide functionality.

Delivering insulation values as low as 1.4W/m<sup>2</sup>K with its three-chambered profile, the CP130 can hold glass panes weighing as much as 300kg. Its sleek midsection makes the CP130 a fantastic choice for rooms with a view, maximising both the amount of clear space and the intake of natural light, while sturdy aluminium frames allow it to achieve Class 2 burglar resistance.

### Why choose a Reynaers CP130LS from the Window Outlet?

- Extremely strong and robust, with vent weight up to 300kg
- Fibreglass-reinforced polyamide strips
- Multi-point locking ensures exceptional security
- Glass thicknesses up to 42mm
- Element heights up to 2700mm
- Available in duo rail and 3-rail configuration
- Purity hardware

## ➤ Reynaers CP155LS

An excellent choice for maximising views and creating stylish, comfortable living spaces, the CP155LS is a premium-quality patio door system respected throughout the industry. Like the CP130, it's highly versatile, thanks to its ability to be configured with two or three rails, but can hold glass of up to 400kg in weight, and can achieve truly impressive dimensions exceeding 10m wide and 3m high.

Thanks to its innovative and highly insulating slide and lift design, the CP155 is extremely thermally efficient, and capable of meeting stringent low energy building requirements.

### Why choose a Reynaers CP155LS from the Window Outlet?

- Premium-quality slide and lift operation
- Hugely versatile, allowing for large dimensions up to 3m in height and 400kg weight vents
- Extra insulation gaskets and enhanced thermal performance
- Ultra-slim middle section delivers uninterrupted views
- Options for automatic opening
- Available in duo rail and 3-rail configuration
- Purity hardware

## ▶ Contemporary entrance doors

Delivering exceptional style and outstanding performance, The Window Outlet's contemporary entrance doors provide precisely the sort of high-end door product needed to attract increasingly discerning and style-conscious end-users.

Strong and durable while still remaining light, aluminium has rapidly grown in popularity as a door-building material – and we can offer two fantastic brands from two of the industry's leading manufacturers.

Scheuco doors, made with Adeco panels, consist of a triple-glazed frame surrounded by a rigid PU foam core, providing a stylish, highly insulating solution that's still able to guard against forced entry.

AluK entrance doors are made from slimline inset door panels, and boast a unique polyamide Euro groove design with slim and deep outer frames for low thresholds.

### Why choose contemporary entrance doors from the Window Outlet?

- Slim line outer frames for enhanced views (profiles as thin as 55mm)
- Additional hardware for enhanced security and resistance (Multi-point locking, ekey finger scanner, restrictors, lever handles)
- High glass specifications with additional triple glazing for ultimate heat retention (A+ Rated)
- Each style available in open-in & open-out configurations
- Low maintenance capability
- Available in single or dual colour options
- Concealed hardware

## ▶ AluK bifolds

Bifolds are the product of the moment – end-users looking for that aspirational, high-end ‘Grand Designs’ aesthetic love them for their style, and they’re one of the biggest growth areas in glass and glazing over the last few years.

Delivering outstanding reliability, performance, and design, AluK bifolds are the ideal choice to satisfy that demand. We offer two models, the BSF70 and BSF70 HD – both of which are durable, weather-resistant, and are capable of holding large glass panels to maximise views and natural light.

### Why choose an AluK bifold from the Window Outlet?

- Wide range of configuration options
- High-performance glazing and design
- Minimal profiles, sleek modern looks
- Full range of standard and bespoke colours
- Dual colour options inside and out

### Configurations

## ▶ AluK BW58 windows

Aluminium's popularity as a material in domestic glazing is booming, thanks to its sleek, clean looks, easy maintenance and fantastic thermal efficiency. At the Window Outlet, we offer a huge range of AluK windows to help you make the most of growing opportunities for aluminium installers.

Robust, weatherproof, and long-lasting, we offer three core products as part of our AluK range:

**Chamfered:** Our Chamfered aluminium windows are perfect for traditional-look properties or for homeowners looking for a classic framing aesthetic.

**Heritage:** Perfect for period properties, our Heritage windows have been designed with acoustic and thermal performance in mind, and can easily replace steel-framed windows.

### Why choose AluK BW58 windows from The Window Outlet?

- Option of projecting top or side hung vents
- Durable aluminium profile provides enhanced weather performance
- Option for child safety restrictions
- Available with double or triple glazing options
- Enhanced security and tested to PAS24
- Multi point locking
- Surpasses the requirement of building regulations
- Green guide 'A' rating
- Standard hardware including concealed friction hinges and multipoint locking
- Thermally broken profiles, with a unique design that improves thermal performance
- Windows Energy Rating = A - C
- U-values as low as 1.4 W/m<sup>2</sup>K

## AluK Slimline

Stylish and versatile, steel-look AluK Slimline windows are the ideal choice for replacing existing steel windows, or just making a sleek, contemporary-looking addition to virtually any style of home or commercial property.

AluK Slimline windows are available in an amazing array of configurations – top hung and slide hung, slide hung and bottom hung, tilt/turn and turn/tilt, tilt and slide, and fully reversible are all possible, and products can be delivered either internally or externally glazed.

### Why choose contemporary windows from the Window Outlet?

- Available internally or externally glazed
- Flat or chamfered details
- 58mm or 70mm frame depth
- Integrated deep head profiles for ease of trickle ventilation
- Polyamide thermal break to maximise thermal efficiency
- Certified under 'Secured by Design' scheme
- Full range of customisable hardware available
- Available in single or dual colours, polyester powder coating and anodised finishes

## AluK Doors

Our entrance doors are manufactured from durable and light aluminium, the perfect material for a high performing entrance door.

The 58BD aluminium door system by AluK is suited to a wide range of applications. A stylish, flexible door with great security features and available in a wide range of styles, the 58BD is competitively priced and offers a versatile entrance solution, suitable for light and medium duty use.

'Secured by Design', this door uses high-performing multipoint locking with a cloaking feature to prevent unwanted access to locking points which further enhances the security of the door.

### **Why choose AluK doors from the Window Outlet?**

- Unique Polyamide Euro groove design
- Sculptured detail that creates a picture frame view through the door
- Designed to incorporate standard and security hardware
- Accepts a full range of restrictors and access control devices
- Available as a standard door option or with PAS23 / PAS24 upgrade
- Multi point locking mechanisms for enhanced security
- Cloaking feature conceals lock and prevents any access to locking points
- 'Secured by Design' certified
- Glazing size range of 28mm to 44mm
- Low threshold option
- Full range of suited hardware
- Available in single or dual colour options, polyester powder coating and anodised finishes

## Commercial Glazing

At the Window Outlet, we offer a robust commercial door and shop-front solution from leading supplier Kaye Building Systems.

The range consists of two core products: the non-thermal KSF, and the thermal KTS option.

The hard-wearing KSF solution is suitable for a wide variety of commercial uses, including both low-trafficked and high-trafficked areas. It's resistant to rust and corrosion, and its openings can be hinged, pivoted or sliding.

The KTS delivers the same advantages as its non-thermal cousin, but the inclusion of a thermal break significantly improves its thermal efficiency, meaning it can meet and exceed even the most stringent building regulations.

Both products are highly versatile, and come with dozens of options that allow you to perfectly tailor them to the requirements of your next commercial project. These include:

- Choice of single or double action pivot doors
- Anti-finger trap functionality
- Option to automate slide and swing doors
- Butt-hinged doors
- Range of shop front and end sections

*Both products come double-glazed as standard*

We also offer the slim but sturdy KLW curtain walling system, offering 50mm sightlines designed to maximise the glazed area and a thermally broken profile for superb thermal efficiency.

- Choice of depths up to 128mm
- Easily integrated with the KSF door system
- Innovative gasket design ensuring ease of glazing
